Vintage Led Light

Vintage LedLight

Vintage LedLight

WIE ZIJN WE?

Vintage Ledlight is een jong familiebedrijf uit het Antwerpse.

Bedrijfsleiders en broers Tobias en Dieter van Daele hebben hun kennis van zaken met de paplepel meegekregen dankzij hun vader, oprichter van pvd concept en pvd verlichting.

Met de nodige ervaring achter de kiezen startten Tobias en Dieter van Daele in 2015 hun eigen LED merk op. Met het oog op een kwalitatief en onderscheidend merk op de verlichtingsmarkt te brengen, creëerden de boers Vintage Ledlight.

In de 7 jaar die volgden, evolueerde Vintage Ledlight sterk waarbij nieuwe markten zich aandienden. Dit resulteerde in een constante groei van export binnen en buiten de Benelux. Dankzij de globale visie zijn de producten van Vintage Ledlight momenteel verkrijgbaar in meer dan 12 landen in Europa en is het gamma uitgebreid tot meer dan 170 artikels.

WHO ARE WE?

Vintage Ledlight is a young family business from Antwerp.

Company directors and brothers Tobias and Dieter van Daele gained their expertise from their father as they were growing up. He was the founder of pvd concept and pvd verlichting.

With the necessary experience under their belts, Tobias and Dieter van Daele set up their own LED brand in 2015. The brothers created Vintage Ledlight with an eye to launching a high-quality brand that would distinguish itself on the lighting market.

In the 7 years that followed, Vintage Ledlight developed strongly and moved into new markets. This resulted in the constant growth of exports, both in the Benelux region and beyond. Thanks to its global vision, Vintage Ledlight's products are currently available in more than 12 countries in Europe and the product range has expanded to include more than 170 items.

Tobias van Daele CEO/Founder

ONZE KWALITEIT EN SERVICE

Vintage Ledlight onderscheidt zich door de constante zoektocht naar verbetering en vernieuwing. Om de vereiste premium kwaliteit te blijven garanderen, worden de lichtbronnen tijdens het complete productieproces aan uitvoerige controles en tests onderworpen.

Tobias en Dieter van Daele sloegen in 2021 de handen in elkaar met SIGNIFY (voorheen Philips Lighting). Dit houdt in dat diens patenten en technologie verwerkt kunnen worden in de Vintage Ledlight producten. Dankzij de samenwerking met deze toonaangevende speler in de wereld van de verlichting zijn de broers in staat hun marktpositie te versterken.

Een belangrijke stap om de kwaliteit en performance van hun lampen tot op een nog hoger niveau te tillen. Familiebånd en teamwork missen hun kracht niet; dankzij kennis, focus en toewijding blijft Vintage Ledlight in volle groei.

OUR QUALITY AND SERVICE

Vintage Ledlight distinguishes itself with its constant search for improvement and innovation. In order to continue guaranteeing the required premium quality, the light sources are subjected to detailed checks and testing throughout the production process.

In 2021, Tobias and Dieter van Daele joined forces with SIGNIFY (formerly Philips Lighting). Now the latter's patents and technology can be incorporated into Vintage Ledlight products. Thanks to their cooperation with this leading player in the world of lighting, the brothers have been able to reinforce their market position.

That has proved to be an important step, taking the quality and performance of their lighting to an even higher level. Family ties and teamwork remain strong; its know-how, focus and dedication are taking Vintage Ledlight from strength to strength.

I never read,
I just look
at pictures.

Andy Warhol

Moderna Museet
Stockholm Sweden
10/2-17/3 1968

VIN 0043

Corddimmer T1, Black

3-35W LED rated power
7-110W Rated power
230V/50Hz

Possibility for optimal dimming and flicker-free dimming of LED lamps

When flickering effects occur during the dimming of an LED lamp, it is possible to adjust the minimum brightness to optimize dimming behavior.

VIN 0045

Corddimmer T1, Transparent

3-35W LED rated power
7-110W Rated power
230V/50Hz

Possibility for optimal dimming and flicker-free dimming of LED lamps

When flickering effects occur during the dimming of an LED lamp, it is possible to adjust the minimum brightness to optimize dimming behavior.

VIN 0044

Corddimmer T1, White

3-35W LED rated power
7-110W Rated power
230V/50Hz

Possibility for optimal dimming and flicker-free dimming of LED lamps

When flickering effects occur during the dimming of an LED lamp, it is possible to adjust the minimum brightness to optimize dimming behavior.

VIN 0046

Corddimmer T2, Black

3-35W LED rated power
5-100W Rated power
230V/50Hz

Possibility for optimal dimming and flicker-free dimming of LED lamps
When flickering effects occur during the dimming of an LED lamp, it is possible to adjust the minimum and maximum brightness to optimize the dimming behavior.

VIN 0047

Corddimmer T2, White

3-35W LED rated power
5-100W Rated power
230V/50Hz

Possibility for optimal dimming and flicker-free dimming of LED lamps
When flickering effects occur during the dimming of an LED lamp, it is possible to adjust the minimum and maximum brightness to optimize the dimming behavior.

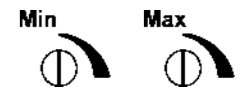

VIN 0048

Corddimmer T2, Transparent

3-35W LED rated power
5-100W Rated power
230V/50Hz

Possibility for optimal dimming and flicker-free dimming of LED lamps
When flickering effects occur during the dimming of an LED lamp, it is possible to adjust the minimum and maximum brightness to optimize the dimming behavior.
